

Research Proposal

Name _____

Title of your project _____

1. What will you find out about?

2. What data will you take? What will be your dependent (measured) and independent (manipulated) variables?

Dependent

Independent

3. How will you gather data? What setup will you use - sketch me a diagram. (What special equipment will you need?)

4. How will you manipulate your independent variables and measure your dependent variables? What factors might compromise the validity of your results?

Dependent

Independent
