1. A bicycle going $13.5 \mathrm{~m} / \mathrm{s}$ has 68.0 cm diameter wheels. What is the angular velocity of the wheels in rad/s? in RPM?
2. What is the tangential velocity of a 4.50 cm radius hard drive spinning at 5200 . RPM?
3. What time will it take a wheel to speed up from $12.0 \mathrm{rad} / \mathrm{s}$ to $47.0 \mathrm{rad} / \mathrm{s}$ with an acceleration of $1.40 \mathrm{rad} / \mathrm{s} / \mathrm{s}$ ?
4. A hard drive takes 4.80 s to speed up from rest to 7200 . RPM. How many revolutions does it go through in doing this?
5. A car with 0.450 m radius wheels speeds up to $28.0 \mathrm{~m} / \mathrm{s}$ over a distance of 112 m with an acceleration of $2.60 \mathrm{~m} / \mathrm{s} / \mathrm{s}$. What is the initial angular velocity of the wheels?
